CFS – Descaler is a safe bio-degradable calcium, lime, rust, mineral and marine growth and descaling agent. Suitable for use as a safe fast and effective alternative to mechanical cleaning of equipment where scaling is an issue. For use in Engines, fresh and seawater cooling systems, strainers, all heat exchangers, water makers, pumps, piping, parts and anywhere requiring mineral, rust or lime descaling.

### Before and After CFS - Descaler

![Before and After CFS - Descaler](image)

**Mixing Ratio 4:1 - 5L of CFS makes 25L**

### TYPES OF APPLICATIONS

CFS - Descaler can be safely used to remove calcium, lime, rust, mineral scaling & marine growth from:
- Engines and seawater cooling systems
- Fresh water systems
- Boilers
- Cooling Towers
- Condensers
- Chillers
- All heat exchangers
- Distillation towers
- Compressors
- Pumps
- Parts
- Piping
- Radiators
- Evaporators
- Generators
- Water makers
- Strainers
- Valves
